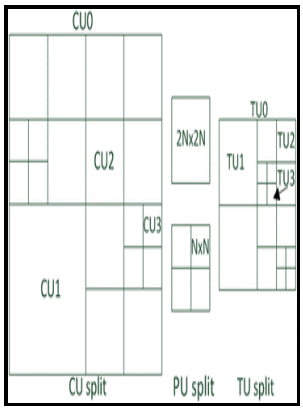
High-speed range estimation based on intensity gradient analysis

Springer-Verlag - (ebook) High



Description: -
-
Scheidt, Samuel, -- 1587-1654. -- Congresses.
Image processing.High-speed range estimation based on intensity gradient analysis
-
Schriften des Händelhauses in Halle -- 5.
Schriften des Händel-Hauses in Halle -- 5
Springer series in perception engineeringHigh-speed range estimation based on intensity gradient analysis
Notes: Includes bibliographical references (p. [175-179) and index.
This edition was published in 1991

Filesize: 49.46 MB

Tags: #Intensity #Gradient #Analysis

To track orders sent by DHL, go to Delivery restrictions Remote areas: Please note that there may be a surcharge if shipping international orders to a remote area. A fast and reasonably accurate perception of the environment is essential for successful navigation of an autonomous agent. You can track your delivery by going to and entering your tracking number - your Order Shipped email will contain this information for each parcel.

High

When will my order arrive? A very interesting aspect of the approach pursued by Skifstad is the method used to bypass the most difficult and computationally expensive step in using stereo or similar approaches for the vision-based depth esti mation. In addition to the estimated delivery date range, on the product page you will find how long an item will take to be dispatched.

Figure 9.7 from High

Cite this chapter as: Skifstad K. Skifstad's dissertation proposes a new approach to recover depth information using known camera motion.

Intensity Gradient Analysis

In: High-Speed Range Estimation Based on Intensity Gradient Analysis. As one might well infer, IGA uses intensity gradients to determine when a fixed image displacement occurs. Most vision techniques to recover depth for navigation use stereo.
