Candidate vaccines against Ebola or malaria—should definitely be used if they are safe and effective, he says, but they could lead to more virulent pathogens. Honestly, this book took me by surprise! Here is a summary: An international company laid a fiber-optic cable completely encircling the Earth, by chance running through a new, privately owned chicken farm in the city of Minsk the capital of Belarus. The chickens refuse to walk or fly over the cable and will only pass under it.
