John Ruskin

Other Gothic arts, such as tapestries and metalwork, continued to be disregarded as barbaric and crude, however sentimental and nationalist associations with historical figures were as strong in this early revival as purely aesthetic concerns. The most common use for Gothic Revival architecture was in the building of churches.

In 1872, , the President of , visited Britain, seeking models and an architect for a planned new campus for the college. The historian notes that, at

one point in the mid-19th century, four different stage adaptations of were running simultaneously in London theatres, and nine separate operas were based on the work. He believed in restoring buildings to a state of completion that they would not have known even when they were first built, theories he applied to his restorations of the walled city of , and to and in Paris.

John Ruskin

The , through its journal The Ecclesiologist, was so savagely critical of new church buildings that were below its exacting standards and its pronouncements were followed so avidly that it became the epicentre of the flood of that affected most of the Anglican cathedrals and parish churches in England and Wales. The firm of was an early and important exponent, transforming the campuses of , and the in the 1890s.
