! It was chiefly in the matter of sexual morality that his doubts and difficulties lay, and I was able to assure him that his experience was but the common experience of all those who had laboured for the uplifting of savage people. It is a sedate, cultured community with a population of about 30,000. This permanganate—we just cut right through the marks of the fangs with a knife; then we draw out as much poison as will come; then we fill the wounds with this stuff, and pretty soon you'll be as good as new.
