Penn Clinical Manual of Urology

Mapping studies of the retroperitoneum have revealed that not all patients with low volume metastatic disease require a full bilateral RPLND. This is the phase in which hydronephrosis and urinary stasis are most pronounced. Abnormal descent can cause a testicle to occupy an aberrant position outside the scrotum.

An Illustrated Guide to Pediatric Urology 2017

Approximately 60% of patients with medullary sponge kidney will pass calculi at some time.

Dysuria and urethral discharge may also be present; however, scrotal edema and patient discomfort may make distinguishing the epididymis and the testis difficult. Examples of those who might be acknowledged include a person who provided purely technical help, or a department chair who provided only general support.

Journal of Clinical Urology

Thanks in advance for your time. Volume two discusses surgical aspects, including reconstructive urology, transplant, uro-oncology and reproductive urology. Lesions greater than 4 cm are especially prone to hemorrhage and many authors advocate prophylactic embolization or surgical excision.
