Marquis Who's Who

Many of the health problems faced by women in older age are the result of exposure to risk factors in adolescence and adulthood, such as smoking, sedentary lifestyles and unhealthy diets. Retrieved September 14, 2016 — via Internet Archive. However, there are exceptions, for instance in China where the suicide rate in rural areas is higher among women than men.

W.H.O. Suggests Women of 'Child

At the same time, attempted suicide is an important risk factor for death from suicide and shows the need for appropriate health services for this group. Disability Other health problems experienced by older women that decrease physical and cognitive functioning include poor vision including cataracts , hearing loss, arthritis, depression and dementia.

Women's Ranking

In 2016, the company's assets, including all the trademarks were transferred to Marquis Who's Who Ventures LLC, which is privately owned.

Women's Health

Biological factors, lack of access to information and health services, economic vulnerability and unequal power in sexual relations expose women, particularly young women, to HIV infection. Maternal health Maternal deaths are the second biggest killer of women of reproductive age.

Marquis Who's Who

Tobacco is a leading risk factor for NCDs and its use is increasing among young women in the Region. Women are not just childbearing vessels. Recent figures indicate that 35% of women worldwide have experienced either intimate partner violence or non-partner sexual violence in their lifetime.

W.H.O. Suggests Women of 'Child

Injuries Both self-inflicted injuries and road injuries figure among the top 10 causes of death among adult women 20-59 years globally.
