Truck Wheels

The Red Panda is the state animal in the Indian state of Sikkim. This is a general description of their habitat otherwise their habitats are found ranging from desserts in Africa to forests in Kenya. The longer horn sits on top of the nose.

Threats

Today, poaching for the illegal trade in their horns is the major threat.

Colobus Monkey

There are fewer than 2,550 black rhinos alive today.

The most endangered species on Earth

In an ecological role, they scatter the seeds that pass through their intestinal tracts, promoting the health of the grasslands and inhibiting the spread of woody plants.

Black rhinoceros

This worksheet can be edited by Premium members using the free Google Slides online software.

Rhinos

Black Rhinos will attack other animals though if their territory is threatened, they also fight amongst themselves. The East African rhino *Diceros bicornis michaeli*, primarily in Tanzania.
