## Health (Meat Inspection, Branding and Processing) Regulations 1950 05

All paperwork must be submitted to the Agricultural Inputs Section, as with initial product registration.

## Federal Meat Inspection Act

Non-Federal jurisdiction of federally regulated matters; prohibition of additional or different requirements for establishments with inspection services and as to marking, labeling, packaging, and ingredients; recordkeeping and related requirements; concurrent jurisdiction over distribution for human food purposes of adulterated or misbranded and imported articles; other matters. Drug Abuse Prevention and Control Act replaces previous laws and categorizes drugs based on abuse and addiction potential compared to their therapeutic value. In 1202, King John of England proclaimed the first English food law, the Assize of Bread, which prohibited adulteration of bread with such ingredients as ground peas or beans.

## Federal Meat Inspection Act

National Center for Toxicological Research is established in the biological facilities of the Pine Bluff Arsenal in Arkansas.

## Milestones in U.S. Food and Drug Law

Animal Medicinal Drug Use Clarification Act allows veterinarians to prescribe extra-label use of veterinary drugs for animals under specific circumstances. The Office of Combination Products is formed within the Office of the Commissioner, as mandated under the Medical Device User Fee and Modernization Act, to oversee review of products that fall into multiple jurisdictions within FDA. Nearly one quarter of a million bottles-enough for every household in the area-were delivered to Harrisburg, Pennsylvania within 72 hours.

## Foodlaw

In addition the act would require stamps on meat products that were sent to market for public consumption. You will not be able to renew online through Kelly Registration Systems as in past years.

## Meat Inspection

FDA announced a ban on cigarettes with flavors characterizing fruit, candy, or clove. Cleared berries were allowed a label stating that they had been tested and had passed FDA inspection, the only such endorsement ever allowed by FDA on a food product.
