## Organizational Dynamics and Intervention: Tools for Changing the Workplace

Usually, this requires the development and introduction of computer hardware and software designed to acquire, store, and allow for the retrieval of information, but support systems also known as expert systems can offer decision guidance in the form of options or recommendations or through the capacity to test out scenarios, allowing a team to validate their initial choices Coovert, 1995. Without the commitment and support of senior-level leadership, even the best intended projects are at great risk of not being successful.
