Cognitive

An initial assessment carried out by the speech and language therapist will determine the types of difficulties an individual with RHCD is having and also the severity of their difficulties.

Right

The majority of the treatments below are based on theories of RHD and treatments designed for disorders caused by brain injury. RHD results in a collection of symptoms that vary in severity and in domains affected, depending on the site and extent of injury to the underlying neural substrate. Some may talk too much or not enough, some will tell stories that are disorganized and hard to follow.
