### Industrial Retardation in Britain, 1880

Dutch and Flemish refugees played a significant role in creating the foundations

of the development of the cotton, silk and other textile trades in England. For many years past a comprehensive annual list of publications on the economic and social history of Great Britain and Ireland has been published.

### Levine Aaron Lawrence 1925

It is interesting to note that a number of Parliamentary Acts during the 19th century prohibited the emigration of workers into mainland Europe as well as placing restrictions on the export of machinery, spare parts, design plans and expertise. This most certainly included sending their sons to Eton or other public schools and Oxbridge and upon graduating they entered the family business ill — prepared to be part of the business lacking the necessary experiences, knowledge, skills and the techniques associated with the industrial processes, technological and scientific concepts and management of the business.

### Some Problems in Business History, 1870

A portrait of Joseph Whitworth is shown below.

### Levine Aaron Lawrence 1925

Therefore a whole new area of material science has had to be established in order to deal with the challenges of the existing technology. Commercial, business and management education was virtually non-existent during most of the 19th century and was even less developed than technical education. For example Figure 1 below shows the dramatic growth in population between 1760 and 1901.
