Headache

However, the of headache varies widely depending on how the survey was conducted, with studies finding lifetime prevalence of as low as 8% to as high as 96%.

Chronic Daily Headache: Mechanisms and Principles of Management

In a recent randomized trial, the stratified-care approach was found to be superior to the step-care approach. In the setting of chronic daily headache, concerns about headache from medication overuse should prompt the physician to consider headache prophylaxis to lessen the need for abortive therapy.
