Subfertility

Injecting fertility drugs to induce ovulation can cause OHSS, which causes swollen and painful ovaries. In the subgroup of truly fertile couples, CPC was statistically age independent as judged by the Wilcoxon test because of high homogeneity even with advancing age. Of the respondents who would operate to remove a fibroid, no age preference was indicated by 31 32% respondents.

Subfertility

Rockville, MD: Agency for Healthcare Research and Quality. Talking to your partner, family and friends can be very beneficial. Details of ethics approval Not applicable.

CKS is only available in the UK

The effects of caffeine on reproductive outcomes in women. Within the EPC program, the key informant role is to provide input into identifying the Key Questions for research that will inform healthcare decisions.

Investigation and management of subfertility

A gynecologist, urologist or family doctor can help determine whether there's a problem that requires a specialist or clinic that treats infertility problems.
