CPNP 2021 Annual Meeting Poster Abstracts

Methodology Quarterly, state level data on prescription drug utilization are available from the Health Care Financing Administration now known as Centers for Medicare and Medicaid Services CMS HCFA now known as CMS.

APhA2010 abstracts of contributed papers

The increased costs associated with the development and use of the newer antidepressants and antipsychotics may pose significant barriers to their general and unrestricted use by consumers. Drug switching reportedly occurs less frequently with mental health pharmaceuticals than with other drug classes.

Methodology of an ongoing, randomized controlled trial to prevent falls through enhanced pharmaceutical care

After Mental Health First Aid MHFA training, pharmacists and student pharmacists can improve mental illness identification, guide patients toward mental health resources, and help patients experiencing a mental health crisis. The American Society for Pain Management recommends the following multifaceted approach for consideration in detecting pain in this population. Oral agents are preferred by many patients, but for those with severe nausea that accompanies a migraine, a non-oral route is the best option.
