Nevertheless, regulatory provisions exist in the Food and Drug Regulations that are directed at pharmacy labels e. However, in the consumer information documents for drugs containing an ingredient listed in the Prescription Drug List that treat serious conditions e. As a person continues to use drugs, the brain adapts by reducing the ability of cells in the reward circuit to respond to it.

## Injection Safety

For a prescription drug product, this consumer information may be a package insert or a document provided to the patient at the point of dispensing. To provide consistency, the use of the pattern: year, month and day established in the foods section of the Food and Drug Regulations is suggested. In settings where assisted monitoring of blood glucose is performed, single-use, auto-disabling fingerstick devices should be used.

## **Medication Guides**

Such statements are considered acceptable for a limited time e. Blood clots can appear in the veins of the legs and can travel to the lungs; this is called Pulmonary Embolism, which can be fatal.

## **Guidance Document: Labelling of Pharmaceutical Drugs for Human Use**

Some terms and phrases used to describe the composition of drug products imply comparisons that convey an erroneous impression regarding a product's value and merit.
