Strom Thurmond

The lake is created by the Thurmond Dam, located on the Savannah River 22 miles above Augusta, Ga. When flows in the Savannah exceed 16,000 cubic feet per second, the gates of the structure are raised, which scientists hypothesized would encourage fish passage through the structure photo by John Hickey, USACE. Thurmond stated that Fortas had backed overturning 23 of the 26 lower court obscenity decisions.

Savannah River

Thurmond stated that Marshall had evaded questions on his legal principles during committee hearings and in spite of his extensive experience, had displayed an ignorance of basic constitutional principles.

Crowds gather as spillway gates gush water in test at Thurmond Dam

Its average annual energy output is 920-million kilowatt hours. Thurmond favored Roosevelt's argument that the federal government could be used to assist citizens in the daily plights brought on by the Great Depression. The bill would cover 24 million Americans over the age of 65 and was meant to augment the Medicare program with prescription drugs being paid for and given to individuals not hospitalized.

Corps to test spillway gates at Thurmond Dam next week
