Foundations of electromagnetic theory (1992 edition)

Following the presentation of the physical and mathematical foundations of electromagnetic theory, the book discusses the field analysis of electromagnetic waves confined in material boundaries, or so-called guided waves, electromagnetic waves in open space, scalar diffraction theory and active devices. Inversion and Imaging of Electromagnetic Field Data 7.

Foundations of electromagnetic theory (1992 edition)

The treatment of electromagnetism from, first, a topological perspective, continuing through group theory and gauge theory, to a differential calculus description is a major thread of the book.

Foundations of Electromagnetic Theory

Intended for those interested in learning the basics of standard electricity and magnetism. Intended for those interested in learning the basics of standard electricity and magnetism.

Foundations of electromagnetic theory (1992 edition)

The book is ideal for geoscientists working in all areas of geophysics, including exploration geophysics and applied physics, as well as graduate students and researchers working in the field of electromagnetic theory and methods. Zhdanov is Professor of Geophysics in the Department of Geology and Geophysics at the University of Utah in Salt Lake City.

Foundations of electromagnetic theory (1967 edition)

Es un muy buen libro para estudiar un primer año de electromagnetismo.

Electromagnetic Methods in the Frequency and Time Domains.

Foundations of electromagnetic theory (1967 edition)

He is the founding director of the Geoelectromagnetic Research Institute of the Russian Academy of Sciences and Member of the Russian Academy of Natural Science. Starting with the fundamentals of electrodynamics, it methodically covers a wide spectrum of research and applications that stem from electromagnetic phenomena, before concluding with more advanced topics such as quantum mechanics. He was a faculty member of Case Institute of Technology now Case Western Reserve University from 1954 to 1965 and was appointed Professor of Physics in 1960.
