Module 14. Creating Quality Improvement Teams and QI Plans

The practical implications in health and social policy are presented in the context of child care services, together with some innovative approaches to future development.

Care Ministry Program Guides

The Leader's Guide is intended to be used in conjunction with all of the need-specific programs. Are you starting or expanding a caregiving ministry in your community? To do this, you will need to work with practice leadership and staff to set up data systems that can produce practice performance reports on key quality metrics on a monthly or quarterly basis. Parish nurses and other resources can help caregivers support all health aspects.

Module 14. Creating Quality Improvement Teams and QI Plans

They should be based on the results of the practice assessment and focus on the areas needing improvement.

Care Ministry Program Guides

Key driver models graphically display the strategies and activities needed to achieve goals and aims of the practice improvement effort. By offering the hope and love of God, congregations can walk with families often isolated by the nature of mental illness- an illness that affects one of every four families.

Module 14. Creating Quality Improvement Teams and QI Plans

This individual understands how the changes will affect the clinical care process and the impact these changes may have on other parts of the organization. As part of developing this plan, you will also need to help the practice establish an inventory of the resources, assets, and personnel talents that currently exist in their practice and can be leveraged to support Care Model implementation and its associated key drivers and change concepts. Packaging should be the same as what is found in a retail store, unless the item is handmade or was packaged by the manufacturer in non-retail packaging, such as an unprinted box or plastic bag.
