

# General investigation of the igneous rocks in the area north of Oslo.

## Oslo University Press - North Atlantic Igneous Province reconstructed and its relation to the Plume Generation Zone: the Antrim Lava Group revisited

Description: -

-  
Boys as soldiers -- India -- Biography.  
Great Britain. -- Army.  
Freeman, Robert Bruce -- Childhood and youth.  
Slavery -- West Indies -- Emancipation.  
Scott, Dred, -- 1809-1858.  
Prussia (Germany) -- History -- Frederick II, the Great, 1740-1786  
-- Miscellanea.  
Prussia (Germany) -- Kings and rulers -- Biography -- Miscellanea.  
Frederick II, King of Prussia, 1712-1786 -- Miscellanea.  
Rocks, Igneous.  
Geology -- Norway -- Oslo. General investigation of the igneous rocks in the area north of Oslo.

-  
Bd. 2-<5 >

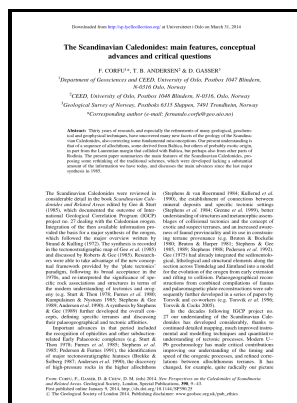

Forschungen und Studien zur Fridericianischen Zeit,  
Studies on the igneous rock complex of the Oslo region -- v. 8.  
Skrifter (Norske videnskaps-akademi. I--Mat.-naturv. klasse) -- ny serie no. 1.  
Studies on the igneous rock complex of the Oslo region -- v. 8  
NY serie/Norske videnskaps-akademi i Oslo. Matematisk-naturvidenskapelig klasse -- no. 1  
General investigation of the igneous rocks in the area north of Oslo.

Notes: Incl. bibl.

In comparing the mean values of radiological parameters estimated with standard value as suggested by , it was observed that all the estimated values of radiological parameters were within the range of international reference value except the gamma dose rate and annual effective dose equivalent which may be as a result of geological formation of the study area which is predominantly dominated by kaolin and gypsum.

U

Francois Mountains are present underneath much of Missouri, including Rolla. The IBF is mostly lateritic and encloses the Tardree rhyolite. Sample Collection and Preparation Soil samples were collected around College of Science and Technology CST environment, Lecture theatre environment LT , College of Petroleum Engineering environment PET and College of Development Studies CDS environment Fig.

### The geology of North Korea: An overview

The gamma representative index estimated is shown in Table.

### The Oslo Rift: A review

In the very northern part of the area a dioritic dyke containing plagioclase and hornblende extends N75oW for more than 150 m. Fifty-seventh sessions, includes Scientific Report: summary of low-dose radiation effects on health.

### December 2016 LIP of the Month

Earth and Planetary Science Letters, 355: 199-212.

Hendriks, The North Atlantic Igneous Province reconstructed and its relation to the Plume Generation Zone: the Antrim Lava Group revisited, *Geophysical Journal International*, Volume 182, Issue 1, July 2010, Pages 183—202, Summary Large igneous provinces LIPs have recently been suggested to originate at the edges of low-velocity zones on the core mantle boundary Plume Generation Zones.

### **Geology and petrography of the Nagar Parkar igneous complex southeastern Sindh: the Dinsi body.**

The quartz latite is about 20 m long and 15 m thick in the centre where it shows a bend from N10oE trend in the northern part to N40oE in the southern part. This location shows what is known as the Great Unconformity in which approximately one billion years the geologic record is missing over much of North America.
