Articles politiques

There are materialist-anarchists as there are others, like myself, who without prejudicing future developments of the human mind, prefer simply to declare their ignorance in these matters.

Articles politiques

Imposed communism would be the most detestable tyranny that the human mind could conceive. But when one is convinced that the organisation is pursuing a course which threatens the future and makes it difficult to remedy the harm done, then it is a duty to rebel and to resist even at the risk of providing a split.

When the Spanish Civil War began in 1936, he collaborated with veterans of Freedom, which had ceased effective publication in 1932, with the new fortnightly, Spain and the World, which then became Revolt! Should we, for this reason, renounce the use of violent means? Some talk of the right to prevent the dissemination of error. I take the opposite point of view because I find the ideas of the practical anarchists of the past more stimulating, as well as being able to relate much of what they say to the present, than their starry-eyed contemporaries whose ideal futures had no practical basis even in the present from which they were launched. In small as well as large societies, apart from brute force, of which it cannot be a question for us, the origin and justification for authority lies in social disorganisation.

Malatesta: Life and Ideas

He is an exemplar of the cosmopolitan nomadic radical who circulated through the circuits of world imperialism, transporting an alternative modernity to that of the Gatling gun, the Holy Bible, and the imperialist iron regime of the mine, the plantation and the factory. Meanwhile all food stocks would be expropriated by the people in revolt and distribution to the different localities and individuals organised through the initiative of the revolutionary groups.

Although the young Malatesta was a key figure in the First International in Italy and elsewhere, his presence in Italy was mainly between 1885 and 1919, when his reappearances occurred during periods of popular unrest: the 1893—94 Fasci Siciliani, the risings of 1897—98, La Settimana Rossa The Red Week of 1914, and finally the Biennio Rosso Red Biennium of 1919—20.

It is true that illusion and absurdity would be determined products of the mechanical functioning of the brain, and as such would be part of the system. But this business of seeking to place the responsibility where it belongs is only of secondary interest to us. We anarchists and the syndicalists of the Unione Sindacale, strained every nerve to push the masses to act for themselves; but the socialist party, which was then led by the communists, and the General Confederation of labour, much stronger numerically, organisationally and materially than we were, were determined to prevent any kind of action, and made great use of the argument that we lacked raw materials in Italy.
