Rainforest Animals: 13 Iconic Rainforest Species Examples ✓ ☐

Glass frog tadpoles freely flow from the trees and fall directly into the water upon hatching. Poison Dart Frogs Poison dart frogs are a group of colorful amphibians in the superfamily Dendrobatoidea.

Native Wildlife Species in Colorado

Iguana Another reptile that thrives in the rainforest ecosystem is the iguana. A wide variety of animal life is found in the rainforest.

Teaching About Forest Animals: Preschool Theme

There are 4 species of anteaters and they range in size from the size of a small cat to the giant anteater which is over 7ft. Remember to always keep a safe distance when viewing or photographing elk.

11 Amazing Rainforest Animals

Sloth One of the most unusual animals on earth, the Sloth, is known for being a very slow animal. Rainforest plants such as large trees, beautiful orchids, strange-looking flowers, and tasty fruits just add to the rainforest biome.

11 Amazing Rainforest Animals

Black Bears Black bear at the Wild Animal Sanctuary. Amazon river dolphin Inia geoffrensis Found: South America Amazon river dolphin The Amazon River dolphin is one of five river-living dolphin species, and the only one found in tropical rainforests. Blue Morpho Butterflies Some of the most in the world are morpho butterflies that belong to the butterfly family Nymphalidae.

Forest Animals

Cultures of indigenous peoples are also at risk of losing their way of life.

Forest Animals

Whilst most rainforests are found in tropical regions, there are actually two types of rainforest: tropical and temperate: Tropical rainforests Tropical rainforests are rainforests located close to the Equator, between the tropics of Cancer and Capricorn. They are hot, humid places with little seasonal variation, averaging temperatures of at least 64 °F. Photo credit: Sergio Izquierdo -- sergioizquierdo.
