Description: -

-

Scattering (Mathematics)

Differential equations. University of Strathclyde seminars in applied mathematical analysis - scattering

-

Shiva mathematics series University of Strathclyde seminars in applied mathematical analysis - scattering

Notes: Includes bibliographies.

This edition was published in 1984

Filesize: 13.76 MB

Tags: #Statistics, #Probability, #Analysis #and #Applied #Mathematics

## Waves seminar

A mathematical expression relating the crack size to the maximum eigenvalue of the associated scattering matrix is derived.

## Characterisation of amorphous and nanocrystalline molecular materials by total scattering

However, techniques mixing genomics and epidemiological factors are still underdeveloped.

## A fractional Fourier transform analysis of the scattering of ultrasonic waves — University of Strathclyde

Helicity is a useful invariant which helps to answer certain variational problems in magnetohydrodynamics. We first explore the energy for a diffuse interface.

## A fractional Fourier transform analysis of the scattering of ultrasonic waves — University of Strathclyde

In: Green's Functions and Boundary Element Analysis for Modeling of Mechanical Behavior of Advanced Materials NIST Special Publication 910 ed. In essence, with the methodology in this paper the fictitious eigenfrequency difficulty, long associated with the BIE for exterior problems, should no longer be a troublesome issue.

## Applied analysis

This paper puts forward a completely objective approach specific to cracks based on the Kirchhoff scattering model and the approximation of the resulting scattering matrices by Toeplitz matrices. Shankland, CrystEngComm, 2010, 12, 1366 DOI: 10. In this talk we will introduce the zero-range process, define condensation and discuss conditions to see a Poisson-Dirichlet distributed condensate in the thermodynamic limit.
