## **Propontocypris attenuata**

Extremely thin branchial plate exopodite with 16 plumose setae. Recurrent species associations and species diversity of cytheracean ostracodes in the upper Austin and lower Taylor groups Campanian, Upper Cretaceous of Travis County, Texas.

## **Distribution and Taxonomy of Shallow Marine Ostracods from the Western Coast of the Red Sea, Egypt**

Second podomere with simple seta at anterior distal end. The suitable environmental factors for this species are: 33.

## **Distribution and Taxonomy of Shallow Marine Ostracods from the Western Coast of the Red Sea, Egypt**

Family: Hemicytheridae Puri, 1953 Subfamily: Orioniniinae Puri, 1953 Genus: Caudites Coryell and Fields, 1937 3. Ostracods of the Egyptian Red Sea Coast are abundant and diverse, until now little investigations carried out on the taxonomy of ostracods in the Red Sea.

## **Propontocypris attenuata**

Ecology: This species found in shallow water and occurred in large numbers in algae. Benson, Smithsonian Institution, studying ostracodes of the International Indian Ocean Expedition. Occurrence: This species occurred in large numbers in the fourth site and moderate numbers in the remaining sites.

## **Recent ostracods from the Persian gulf**

Synopses of the Antarctic Benthos. Tide-influenced sedimentary environments and facies, pp 289—300.
