### Army's Aerial 'Jump to the Future' Would Replace Iconic Choppers

I think future aircraft will be slower in the future based on the cost of fuels and energy efficiency; and of course minimising the damage to the environment.

### What Will Airplanes of the Future Look Like?

Change that will not just affect the commercial airline industry or the military, but rather the entire world. When demand for an alternative fuel source that would produce 50% fewer carbon emissions than traditional combustion engines became apparent, companies scrambled for solutions. But it would be far better if breakdowns could be eliminated altogether.

What are some other future airplane concepts? And honestly we are becoming obsolete if we do not jump to the future.

### 7 Future Aircraft Concepts That Could Change Aviation

Such aircraft may be one way to cut the Gordian knot of ever-denser land traffic, the report concludes. However, this problem should go away in the time since better-designed airplanes require less power each passing year.

SINCE THE DAWN OF AVIATION, bold souls have been trying to do for planes what Henry Ford did for the automobile--make them widely

accessible. In less than 2 seconds, it had figured out how to use other control surfaces--rudder and ailerons--to compensate for the jammed stabilator. Aircraft may even incorporate ways to mend themselves.
