## [PDF] INVERTER CIRCUIT DIAGRAM WITHOUT TRANSFORMER

As the capacitors discharge in series, the sections 7 and 8 of stage I are raised to a voltage  $V$  with respect to the grounded strip 4. Figure 5-1 illustrates the relationship between the transmitter, duplexer, antenna, and receiver in a simple radar system.

## [PDF] INVERTER CIRCUIT DIAGRAM WITHOUT TRANSFORMER

Available from IEEE Single Copy Sales Institute of Electrical and Electronics Engineers c1978. Its purpose is to generate a high- pulse from a low-voltage DC supply. The use of a flat line described in the present example makes it possible to reduce the inductance  $L$  or, more precisely, the inductance introduced by each stage in addition to that of the capacitor  $C$ .

ژنراتور مارکس

Proper performance depends upon selection and the timing of the discharge.

## Pulse Power Modulator Symposium

As a possible driver to its future needs on flash X-rays radiography, the CEA is working on linear transformer driver LTD generator. For this purpose, the upper strip 3 is interrupted by three successive gaps iC FIG. The main discharge is on the left.
