

# Eicosanoids and other bioactive lipids in cancer, inflammation, and radiation injury - proceedings of the 2nd international conference, September 17-21, 1991, Berlin, FRG

Kluwer Academic Publishers - Springer

Description: -

-  
Radiation-Protective Agents -- therapeutic use -- congresses.  
Radiation Injuries -- physiopathology -- congresses.  
Neoplasms -- physiopathology -- congresses.  
Lipid Peroxides -- metabolism -- congresses.  
Inflammation -- physiopathology -- congresses.  
Eicosanoids -- metabolism -- congresses.  
Radiation-protective agents -- Congresses.  
Eicosanoids -- Congresses.  
Inflammation -- Mediators -- Congresses.  
Radiation injuries -- Pathophysiology -- Congresses.  
Carcinogenesis -- Congresses. Eicosanoids and other bioactive lipids in cancer, inflammation, and radiation injury - proceedings of the 2nd international conference, September 17-21, 1991, Berlin, FRG

71

Developments in oncology ;Eicosanoids and other bioactive lipids in cancer, inflammation, and radiation injury - proceedings of the 2nd international conference, September 17-21, 1991, Berlin, FRG

Notes: Includes bibliographical references and index.

## Eicosanoids and Other Bioactive Lipids in Cancer, Inflammation and Radiation Injury

Synopsis In recent decades eicosanoids have been attracting an increasing amount of attention as a result of their important physiological roles in many areas of biology and medicine. Dust Jacket Condition: No Dust Jacket. Eicosanoids form a link between different fields of research into such areas as cancer inflammation and radiation induced injury this link provided the impetus for the development of the conference series of which the present volume represents the proceedings of the second international conference held in berlin in october 1991.

## Bioactive Lipids in Cancer, Inflammation and Related Diseases

This rapid decline is mostly due to a growing manufacturing industry, which is constantly increasing the knowledge, the number of applications and

the improvements of both these technologies.

Ces T 2009 Transportation options in a carbon constrained world: hybrids, plug-in hybrids, biofuels, fuel cell electric vehicles, and battery electric vehicles. The eicosanoids comprise the prostaglandins, thromboxanes and leukotrienes and are products of arachidonic acid, an essential polyunsaturated fatty acid stored in tissue phospholipids. All this is at the expense of cost and computational difficulty.
