

Investigation of cobalt complexes of Schiff's bases and dioximes - radical precursors and molecular recognition.

Derbyshire College of Higher Education - Accurate spin

Description: -

-Investigation of cobalt complexes of Schiff's bases and dioximes - radical precursors and molecular recognition.

-Investigation of cobalt complexes of Schiff's bases and dioximes - radical precursors and molecular recognition.

Notes: Thesis (PhD) - CNAA, 1992.

The synthesis, characterization, DNA/protein interaction, molecular docking and catecholase activity of two Co(II) complexes constructed from the aroylhydrazone ligand

Inorganica Chimica Acta, 362 10 , 3648-3656.

Synthesis, structures and urease inhibitory activity of cobalt(III) complexes with Schiff bases

Corrosion studies of aluminium metal and its alloys have received significant consideration because of their extensive industrial applications and economic impacts. Results from administration trials with cobalt-containing supplements showed that common supplements could elevate urinary and plasma cobalt levels above the proposed thresholds within 24 h of administration. © 2017 Wiley Periodicals, Inc.

Volume 4

Synthesis and Reactions of a Redox-Active α -Diimine Aluminum Complex. PVAc-b-PAN block copolymer is collected as a free flowing powder at the end of the process although the dispersity of the copolymer increases with the reaction time. The microstructure and elemental composition were characterized using scanning electron microscopy combined with energy-dispersive X-ray spectroscopy.

Optimization of Gaussian

This latter, on reaction with zinc II , provides the following complex.
