### Borden (company)

A further change occurred in 2008 when Transport for London removed the serif from the numeral '1' and also altered the '4', in both cases reverting them to their original appearance. An independent characteristic length is called the coherence length.

### Condensed Matter Theory

The section consists of two highly collaborative groups, and. The holding company reversed itself 13 years later when it reacquired its child company. But the limit on its products was short-lived.

### London Condensed Itinerary

He also found a way to seal it into small cans. Dairy Farmers of America retains Borden cheese. Borden began selling processed milk to consumers in 1875 and pioneered the use of glass in 1885.

### Underground

Johnston's alphabet marked a break with the kinds of sans serif then popular, now normally known as , which tended to have squarer shapes inspired by signwriting and type of the period.

### Theory & Simulation of Condensed Matter

Although Borden retrenched in the inflationary 1970s, it embarked on a second wave of mergers and acquisitions in the 1980s.

### Slow Cooker London Broil

A similar problem exists with Gill Sans, which was at first often referred to by other names such as its order number, Series 238, Gill Sans-serif, or Monotype Sans-serif. In deep financial difficulty, Borden was bought out by KKR in 1995. Borden and other dairy companies were investigated in 1938 for violations of the , but the charges were dropped after Borden signed a in 1940.

## **Theory & Simulation of Condensed Matter**

Several digitisations of the Johnston type exist. Unlike many sans-serifs of the period, Johnston's design while not slender is not particularly bold.
