Essentials and guidelines for clinical medical physics residency training programs: executive summary of AAPM Report Number 249

It is recommended that a physician and a resident representative be involved, at least during select portions of the meeting or select meetings. MEDICAL PHYSICS EDUCATIONAL COMPETENCIES Medical physics residency programs must develop a curriculum and competencies for their residents. Ethics A residency program should include instruction on medical ethics.

Essentials and guidelines for clinical medical physics residency training programs: executive summary of AAPM Report Number 249

Our residents begin their 24-month residency program in July.

Medical Physics Residency Curriculum

A resident's prior training may be a reason to modify the training content of a rotation e.

Medical Physics Residency Curriculum

In 2010, the AAPM Work Group on Periodic Review of Medical Physics Residency Training was formed and charged with updating AAPM Report Number 90. It may also be helpful to have an institutional administrative representative on the committee in a nonvoting position or as a liaison to the committee.

Essentials and guidelines for clinical medical physics residency training programs: executive summary of AAPM Report Number 249

It is important to note that portions of clinical training may take place at affiliated institutions.

Curriculum

The institution and program should promote and demonstrate a commitment to patient safety, emphasizing that patient safety is first and foremost amongst their core values. This is a two-year medical physics residency position where the individual will receive training in all clinical aspects related to the practice of Therapeutic Medical Physics e.

AAPM Committee Tree

This provides the foundation for the physicist to manage the broad range of medical physics tasks involved in caring for patients in diagnostic and interventional radiology, nuclear medicine, or radiation oncology. Residents' scholarly activities The training program should include opportunities for residents to participate in scholarly activities.

Medical Physics Residency

Staff evaluations should be reviewed by the program director as evaluations are submitted.
