### The Impact of the Industrial Revolution on British Society and Economy

This involved making bar iron with a reverberating furnace stirred with rods. Steam and coal Because there were limited sources of power, industrial development during the early 1700s was initially slow.

### The Warming Effects of the Industrial Revolution

Though Britain by no means lost its lead, the stimulus provided generally to Western economies by the introduction of railway systems throughout much of the world carried Europe and America far enough and fast enough to allow them to become genuine competitors with the British.

### Beginning of Industrial Revolution In England

This remarkable growth and benefit was one of the social change that happened in the course of the Industrial Revolution. His ideas would be shaped and developed throughout the years in order to create an automatic loom for the textile industry. With the development of stronger rails made of rolled wrought iron and the steam engine, long-distance railways hauled by steam locomotive became possible.

### Timeline of the Industrial Revolution

The Future of Freedom Foundation. The modernization of innovation prompted the generation of scaled down material which had a vital influence in promoting space research and biotechnology.

### Industrial Revolution: Industrial Revolution in England and Europe

Why did the Industrial Revolution begin in Britain? There was a massive expansion of cities and industrial towns centred around the new factories, for example, Manchester used to be a small town with almost 28,000 residents in 1780.

### Timeline of the Industrial Revolution

Stearns 1998 states that as a consequence of Revolution, around three quarter of early workers are children and women. Population continued to

increase, not only throughout Europe, but also in those areas now more and more dependent upon the importation of manufactured goods Latin America, for example. Most roads were in a terrible state early in this period.

### **Population Growth and Movement in the Industrial Revolution**

Though many people in Britain had begun moving to the cities from rural areas before the Industrial Revolution, this process accelerated dramatically with industrialization, as the rise of large factories turned smaller towns into major cities over the span of decades.

ADVERTISEMENTS: Industrial Revolution: Industrial Revolution in England and Europe! It shows that in the course of the Industrial Revolution, the increase profit gained by the upper class and country, was based on the sacrifice of working class which suffered from poor living conditions and working conditions. Increasing numbers of out-of-wedlock births, believed to have been due to the influences of urbanization growing more prominent and traditionalism growing less prominent on the mindset of women, also contributed to this growing birth rate.
