Unless otherwise authorized by the FAA, when it is necessary to use an instrument approach to a civil airport, each person operating an aircraft must use a standard instrument approach procedure prescribed in part 97 of this chapter for that airport. In the case of failure of the single low-frequency radio range receiver, or ADF receiver, the flight must be able to proceed safely to a suitable airport by means of VOR navigation aids and complete an instrument approach by use of the remaining aircraft VOR equipment.

## Rotorcraft Flying Handbook

Boeing added that the current definitions are adequate and familiar to pilots.

TAOARC commented that the Aviation Rulemaking Advisory Committee's ARAC's All Weather Operations Working Group has already initiated a review of this terminology and that the FAA should defer final action until that group completes its review. In order to clarify for operators with RNAV systems that they must ensure that aircraft's RNAV system is suitable, the agency believes that it is necessary to adopt a definition of that term in § 1. In English online and download now our free aeronautical information manual definition to use any time at charge.
