Let children know that we have noticed by giving positive attention, sometimes through comments, sometimes through just sitting nearby and observing.

### Revised Bloom's Taxonomy • Center for Excellence in Learning and Teaching • Iowa State University

In the student-centered classroom, teaching and assessment are connected because student learning is continuously measured during teacher instruction. Teaching can be bewildering, discouraging, and tiring. Teaching need not fill you with the same kind of ineffable joy and contentment you experience when you write code or read poetry or track data or study policy or make music or collect bark samples or whatever your vocation.

### Teamwork Skills: Being an Effective Group Member

Trust also grows as group members demonstrate personal accountability for the tasks they have been assigned. Yet many advanced degree programs offer little meaningful professional teaching development for their students. What role do you play in resolving these conflicts? We welcome accompanying assistants, interpreters, and note-takers.

### Teamwork Skills: Being an Effective Group Member

So colleges and universities should offer them some sort of compensation, like a lighter teaching load the first semester or extra pay.
