Under the Sky in California: Saunders, Charles Francis, Saunders, E. H.: satis.farmjournal.com: Books

This book, written out of the personal experience of man and wife of very limited physical strength, is designed to combine with some hint of the beauties and interests which lie outside the regulation sights, certain practical directions for travelers who may desire with comfort and safety to taste something of California's wilder side. For those interested in California life in the early part of the 20th Century, this fascinating fourth edition is an eye-opener to a state that has been so built up over the past century that it is unrecognizable. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
