The pipe is then sprayed with a light coating of protective oil. To finish, it is rinsed with cold and hot water, dried and then rolled up on large spools and packaged for transport to a pipe making facility. Our A53 sch 80 Steel Pipe is a tested pipe that can be used for structural or pressure applications and may have a black coated finish.

### Large Diameter Steel Pipe

Large Diameter Steel Pipe Larger pipe projects leave less room for error — imprecision can spell the end of otherwise successful jobs and critical systems. They are produced by two distinct methods which result in either a welded or seamless pipe.

### Galvanized Steel Pipe

What is the Nominal Pipe Size NPS? This method was developed during the late 1800s.
