The county was created in 1873 and later organized in 1881. That said, nav should still display as this script should not prevent text display. Some Environmental Aspects of Strip Mining in North Dakota, edited by Mohan K.

### North Dakota Geologic Survey

The high density of wetlands and mixed grass prairie which developed on the glacial sediments of the Missouri Coteau support an abundance of waterfowl and other marsh dependent birds. Geologists with the North Dakota Geological Survey study the mineral resources of the state and make their findings available to the public.
