## Speculum Uranico

From the typical Galilean telescope of 5 or 6 feet in length, astronomical telescopes rose to lengths of 15 or 20 feet by the middle of the century. His most famous work on cartography was *Kurze Anweisung, wie künstliche Landtafeln auss rechtem Grund zu machen* Brief instruction on making land maps 1629. With a little foresight, this can be done during the last diurnal rotation of Cowboy Astronomer.

## Ad astra per aspera

He gave the astronomical lectures from now on. La Tavola La tavola con le costellazioni celesti tradizionali: Su E.

## The Galileo Project

Special thanks to Candace Magruder for reading the literary quotes. Among the other symbols we can identify: the fleur-de-lys of France n.

## Wilhelm Schickard and his Calculating Clock

Johannes Kepler, who had come to Tübingen to defend his mother in a witch trial, met him there in 1617. On behalf of Count Gronsfield, who was interested in his mathematical and even more in his geodetic work, he carried out surveys in the Stuttgart-Herrenberg-Tübingen area and in the Sinzheim-Bruchsal-Pforzheim area from February to July 1635. He continued this work with the Lutheran Church until 1619.
