Point Pelee (ON006)

The chief threat to the species is a decline in habitat quality and extent due to forest succession in the core breeding sites and other areas of suitable habitat in Ontario. Department of Biology, Connecticut College, 270 Mohegan Ave, New London, CT, 06320.

Point Pelee National Park

Each year, forest health indicators are monitored and the deer population is counted. The Carolinian Woodlands Recovery Plan Jalava et al. This plan puts into practice recovery goals presented in recovery strategies already developed for some of the species at risk in this plan, which were subject to SEAs during the development of those documents.

Contact

An approach toward understanding wildlife-vehicle collisions. Conservation Areas There are over 250 conservation areas across Ontario.

Deer Herd Reduction, Point Pelee National Park

Species at Risk Act Recovery Strategy Series.

Contact

In addition, Brown and Brooks 1994 showed that some individuals travelled up to 4 km 1 km on average away from their summer home range to return to an overwintering site. Footnote 5 Orifice under the tail where the intestinal, urinary and genital tracts meet; it is the opening used for reproduction and for the excretion of wastes.

Snapping Turtle (Chelydra serpentina): Management Plan 2020

Biological Conservation 144: 1159 to 1166. Environment and Climate Change Canada, Ottawa, iv + 40 p.

National Parks of Canada
