A systematic review of randomized controlled trials of interventions designed to decrease child abuse in high

. Our findings suggest there should be further research on using AAT to increase engagement for youth in substance and mental health treatment.

Cognitive

Hall 1987 The effects of peer social initiations on the social behavior of withdrawn maltreated preschool children. A focus on the abused child has been thought to be a victim-blaming strategy.

Approaches to Treatment

Strengths of this study include: 1 the sample came from a primarily low-income Hispanic population which is underrepresented in AAT research literature Risley-Curtiss et al. Level and Pattern of Alcohol Use Self-reports of the frequency and quantity of recent alcohol use remain the most reliable indicators of alcohol consumption patterns available. We need employers to ensure that domestic violence victims can keep safely working.

7 INTERVENTIONS AND TREATMENT

Once you have identified an alcohol problem and have determined that a brief intervention approach would be appropriate, you are faced with a series of clinical decisions.

Section of CA Law & Code of Ethics Pertaining to Spousal and Partner Abuse

Many factors can affect referral decisions, including availability of services, costs to clients and sponsors, ease of access, client attitudes, perceived

need, and organizational relations Knudsen, 1988. Addressing prescription opioid overdose: data support a comprehensive policy approach. *Child Abuse and Neglect* 6:343-350.
