**The Mind and the Eye: A Study of the Biologist's Standpoint by Agnes Arber, P. R. Bell**

In fact, it discovered itself first. The brain, therefore, is not the mind but simply part of the body.

## Mind Body Debate

As always, I prefer if you post your comments and questions here, in the comments section, rather than send them to me by private email.

## Psychology Perspectives

The protrusion of the eyeballs—proptosis—in goitre is caused by the collection of fluid in the orbital. How could something so complex, they argue, have developed through random and , even over millions of years? The Social Dynamics of George H.

## What is the Mind?

Mind is not a substance located in some transcendent realm, nor is it merely a series of events that takes place within the human physiological structure. One study found that such play led not just to cognitive improvements, but also to better self-concepts and enhanced qualities of life in elderly participants Torres, 2011. The acts of the individual are, according to Mead, aspects of acts that are trans- individual.
