## Join Roofs

The benefit is greatest for buildings with a high roof—to—wall ratio i. A green roof can help prevent this by retaining water in the plants and growing medium, thus slowing and reducing the amount of storm water entering the ecosystem and, consequently, reducing flooding and erosion. The wall must be attached to the target roof and the target roof must be a footprint roof.

## Pana Roof

. Su principal constituyente, el PVC junto a la resina sintética ASA Acrílico-nitrilo, Estireno y Acrilato , le confieren sobresaliente resistencia y excepcional durabilidad. It also increases oxygen production.

## Roofland · Roofing & Insulation Systems

The University of Michigan performed a valuation study comparing a 2,000 square meter conventional roof and a green roof. Extends Roof Life A green roof can increase the life expectancy of a roofing system by protecting the roofing materials from direct ultra—violet radiation and extreme temperatures. You can join roofs to other roofs or walls, or unjoin them if they were previously joined.

## Roofland · Roofing & Insulation Systems

· Cero gasto en mantenimiento.
