## Impact of Covid

Board of Education to create parity within public schools. .

## Social Inequality, Childhood and the Media

Somewhat utopian visions such as this run the risk of overlooking issues of ICT and inclusion, where I see it having potentially a darker side when viewed in the context of social inequality and exclusion.

## Digital divide

In that way, young urban men and women with high levels of education who lived in small families with children were the greatest adopters of new media. Yet, they are sucked into educational models that restrict technology use to the facility, and as a result, are forced to measure student growth through traditional metrics.

## Number Matters: The Multimodality of Internet Use as an Indicator of the Digital Inequalities

When it comes to cyber-bullying, victims tend to more often report timidity, depression and uncertainty in dealing with social contact.
