MK 48 Torpedo Composite Fuel Tank

They are able to reach shallower water than boats can, and deeper water than human divers or tethered vehicles can.

Underwater Gliders

Today, Bezos controls nearly 40 percent of all e-commerce in the United States. They are considered autonomous because they have no physical connection to their operator, who may be on shore or aboard a ship.

Appendix Summary of Characteristics, Status and Use of Undersea Vehicles Worldwide

Because that is the best way to avoid discovery. Similarly, there is an increasing need for onboard autonomy that can facilitate the employment of multiple cooperative vehicles, both unmanned and manned.

Underwater Gliders

The coastal State may not levy execution against or arrest the ship for the purpose of any civil proceedings, save only in respect of obligations or liabilities assumed or incurred by the ship itself in the course or for the purpose of its voyage through the waters of the coastal State.
