They are also compact and lightweight. You will discover: What you need to get started: a clear night, a red light flashlight, and a copy of The Backyard Stargazer to guide your observing sessions Seasonal star maps to help you spot constellations, and more, year round Things you never knew about the Moon, Sun, and planets What causes an eclipse and how you can travel to see one How stars are born and where comets come from How to photograph auroras, meteors, and constellations What you can see with the naked eye, binoculars, and, when you're ready, a small telescope Includes 46 easy projects for planet watching, moon viewing, and constellation spotting Additional Information Series Subjects -- -- Publisher Gloucester, Mass. P615 2005 Location CLP - Main Library Collection Second Floor - Non-fiction Call Number QB63.

## 5 Best Telescopes For Stargazing In 2021 (Multiple Budgets)

Choosing the right one for you depends on several factors: the objects you wish to observe; how tolerant you are of optical imperfections; whether you want narrow or wide fields of view; whether or not you wear glasses; and as always how much you are prepared to spend. This assembly then connects to the tripod, which should be of sufficient strength and durability to carry its load.

## Ultimate Best Telescope Buying Guide 2021 • The Planets

Choosing an Astrophotography Telescope: My Top 5 My goal is for you to find an astrophotography telescope that allows you to capture sharp, colorful pictures of stars, galaxies, and nebulae in your own backyard.

## The 19 Best Astronomy Apps in 2021

Binoculars in this range are still small and light enough to be handheld, while larger models would probably require a tripod, or a method of

steadying them. When dust accumulates on a lens or mirror, it distorts the light and makes it harder to see planets and stars.

### **Night Skies of the Winter Solstice**

Additionally, it helpfully comes supplied with an accessory tray for stashing your biscuits in, and more importantly two 1. SkEye operates like most other star map apps, with a built-in catalog of stellar objects, a search function and a time machine mode for viewing the night sky in the past or future. All telescopes are capable of magnifying power simply by switching eyepieces.

### **Library « Sunshine Coast Centre RASC**

He loves water sports such as paddle boarding, kayaking, snorkeling, and scuba diving.
