## Pollution prevention

While these methods are to be individually used as a basis for comparison of either absorbents or adsorbents in a consistent manner, they are not useful for a cross comparison of absorbents with adsorbents, even though according to ASTM F716-09 all absorbents exhibit adsorbent properties. Contact Name: Safety Director Location The university is located within the City of Radford, Virginia. The use of these agents results in minimal dissolution, dispersion, or transfer of oil into the water column.

## Environmental Compliance

Allow for the flow of storm water under the barrier.

## Federal :: National Oil and Hazardous Substances Pollution Contingency Plan

While RRTs and ACs should consider the discharge scenarios described in ACPs when identifying discharge situations in developing preauthorization plans, the Agency believes they should also have the flexibility to consider other discharge scenarios. Approximately seventy percent of the campus is complete.

## Oil and Hazardous Substances Response

This proposed requirement is not intended in any way to supersede any other federal labeling requirement in place e. The remaining three reactors are expected to be operational by 2021. The Agency believes these are fundamental elements that would inform an assessment of the overall ecological risks for the OSC to consider when authorizing the use of chemical or biological agents.
