## Delinquent behaviour and emotional intelligence among inmates of juvenile homes in Kerala, India

And delinquents are likely to become inadequate parents.

### The Development of Delinquency

Historically, one aspect of family structure that has received a great deal of attention as a risk factor for delinquency is growing up in a family that has experienced separation or divorce.

### Juvenile Delinquency

Social bonds are important for both males and females, but different aspects of the bond are relevant for each gender. One of the clearest findings in research on academic tracking in secondary school is that disproportionate numbers of poor and ethnic minority youngsters particularly black and Hispanic are placed in low-ability or noncollege prep tracks Oakes, 1987. Conduct disorder is often diagnosed when a child is troublesome and breaking rules or norms but not necessarily doing illegal behavior, especially at younger ages.

### Juvenile Delinquency

There is a suggestion that women who persist in crime past adolescence may be more disturbed than men who persist Jordan et al. These and other studies have been unable to identify specific mechanisms to account for the fact that the number of prenatal and perinatal abnormalities tend to correlate with the probability that a child will become a criminal.

### The Development of Delinquency

For boys, running away may be an indirect consequence of childhood victimization or may be part of a larger constellation of antisocial and

problem behaviors Luntz and Widom, 1994. Furthermore, there is the question of how the delinquent peer group initially became delinquent.

### **Backgrounds of Delinquent Behavior**

It may be more fruitful to construct intervention groups so that low- and moderate-risk youth are included with their high-risk counterparts to minimize the possibility of deviancy training and harmful intervention effects. Originally, the juvenile justice system was created as a separate entity from the adult legal system in recognition of the developmental differences between children and adults. In contrast, children who have suffered parental neglect have an increased risk of delinquency.

### **juvenile delinquency LRA**

It is also important to note certain works of legislation that have already been published in the United States in response to general prisoner re-entry, extending to juveniles, such as the and most recently, the Juvenile reform Juvenile reform deals with the vocational programs and educational approach to reducing recidivism rates of juvenile offenders. These interventions can be implemented in the family, at school, or even in correctional facilities. In 85% of the instances, overt delinquency has the involvement of such juveniles who had performed various acts of degraded moral standards, however, were not adequately handled, considering their tender ages.
