**The Young Child as Scientist: A Constructivist Approach to Early Childhood Science Education / Edition 3 by Christine M. Chaille, Lory Britain**

She has spent many years teaching young children and has spent over four years writing curriculum for churches. The book includes numerous activities that examine the child as a theory builder and establish a constructivist curriculum that involves the children in actually doing science. Spine may show signs of wear.

How Can I Make It Move? The Young Child as a Scientist stresses that children have wonderful ideas together, through collaboration. The Child as Theory Builder -- Ch.

### **The Young Child as Scientist: A Constructivist Approach to Early Childhood Science Education by Christine Chaille**

How Can I Make It Move? Using three traditional content areas of science - chemistry, physics, and biology - and translating them into developmentally appropriate practices, The Young Child as Scientist leaves behind rigid views of science education. Without being a cookbook approach to curriculum planning or a purely theoretical approach, the text weaves practical examples and theory together to present constructivism as it can be implemented in real preschool and elementary classrooms. Description Young children — how they experience the world, interact with each other, pose questions, and construct knowledge — form the basis for this insightful examination of early childhood science education.
