## Cognition

Prerequisites: COGS 18 or CSE 8B or CSE 11 and MATH 18 or MATH 31AH and MATH 20E and MATH 180A and COGS 108 or COGS 109 or COGS 118B or CSE 150 or CSE 151 or CSE 158 or ECE 174 or ECE 175A or consent of instructor.

## Rita Nolan, Cognitive Practices: Human Language and Human Knowledge

Moody-Adams 1997 argues that, absent a complete understanding of another culture's beliefs, we might mistake differences in factual beliefs for moral differences. Some organizations are accelerating the process of breaking organizational silos by leveraging organizational network analysis to identify topics and experts in an effort to better understand how they interact with one another.

## Culture and Cognitive Science (Stanford Encyclopedia of Philosophy)

This shows how the simulation mode is not interested in results accomplished through nonhuman processes, even if following nonhuman processes is not the most optimal solution to accomplish such results, like applying statistics to calculate probabilities. Anthropologists observing this practice, such as Franz Boas, were struck by how different the world's languages can be, and they began to wonder whether these differences pointed toward differences in how cultural groups understand the world. As a culminating experience, master's students in this area of focus create and evaluate an educational technology application.

## Human Language

For more information, email Professor Herbert Ginsburg ginsburg tc.

## Human intelligence

For preschoolers, scientific investigation includes making observations, recording them, talking about them, and analyzing them. Morality is also influenced by culture.
