

Health and low-frequency electromagnetic fields

Yale University Press - Health Effects Of Electromagnetic Radiation

Description: -

-
Labor supply -- Spain.
Employment forecasting -- Spain.
Occupations -- Spain.
Christianity.
Christian sects.
Electromagnetic fields -- Health aspects
ELF electromagnetic fields -- Health aspects
Health and low-frequency electromagnetic fields
-Health and low-frequency electromagnetic fields
Notes: Includes bibliographical references (p. [173]-182) and index.
This edition was published in 1994

Filesize: 69.109 MB

Tags: #Electromagnetic #Fields #and #Cancer

What is the current understanding regarding the health effects of low

What are the health effects linked to electromagnetic fields? Similarly, no animal experiments have shown that EMFs, even at high doses, can act as a direct carcinogen or can affect reproduction, development or behavior in animals. Several small studies of this question have yielded inconsistent results —.

Electromagnetic Fields and Cancer

Review of the epidemiologic literature on EMF and Health. Health Effects Of Electromagnetic Fields On Children Other E-cep. .

Electromagnetic Fields: 7. Extremely low frequency fields like those from power lines and household appliances

Government's Committee on Interagency Radiation Research and Policy Coordination that was coordinated by Oak Ridge Associated Universities.

Health Effects Of Electromagnetic Radiation

Overview Extremely low frequency ELF fields includes alternating current AC fields and other electromagnetic, non-ionizing radiation from 1 Hz to 300 Hz. It also found that the epidemiologic studies on radiofrequency exposure do not show an increased risk of brain tumors or other cancers of the head and neck region, although the possibility of an association with acoustic neuroma remains open. There is a need for hypothesis-based studies on in vitro studies to examine specific diseases.

Research on Magnetic Fields Extremely Low Frequency Electromagnetic Fields Cancer and Miscarriage

Again, studies have not found consistent evidence for an association between the use of household electrical appliances and risk of childhood leukemia. Progress in Biophysics and Molecular Biology 2011; 107 3 :339-342. Occupational exposure to magnetic fields and breast cancer among women textile workers in Shanghai, China.

Electromagnetic Fields: 7. Extremely low frequency fields like those from power lines and household appliances

Childhood leukemia and magnetic fields in Japan: A case—control study of childhood leukemia and residential power-frequency magnetic fields in Japan. Electric blanket use and breast cancer on Long Island. Parental occupational exposure to extremely low frequency magnetic fields and childhood cancer: A German case—control study.

What is the current understanding regarding the health effects of low

Most important, there has been no case in which even tremendously high exposure to EMFs has been shown to affect the DNA of the cell, damage to which is believed to be essential for the initiation of cancer. These EMFs can come from a number of sources. Association between exposure to pulsed electromagnetic fields and cancer in electric utility workers in Quebec, Canada, and France.

Electromagnetic Fields and Cancer

The precise factors that are related to an increased number of childhood leukemia cases need to be identified. Symptoms included headache, paresthesia, diarrhea, malaise and lassitude.
