Secondary Education

The course scope includes an emphasis on the foundational literature in curriculum theory, as well as historical and current curricular structures and best practices specific to developmental education. In fact, the emphases of the secondary curriculum have shifted according to local and national goals; the historical, philosophical, and intellectual context; and societal beliefs about the role of youth in society, as well as other factors. The course provides information about formal and informal assessment for the identification of cognitive aptitude, academic achievement, social, emotional, and motor development, as well as the implications of these results for instruction and remediation.

Secondary Education

Using a social constructivist lens, this course examines broadening conceptions of literacy and what it means to be literate in the 21st century.

Secondary Education (B.A.)

Emphasis is placed on procedures for writing research papers and proposals.

Secondary education development program (sedp) power point

WHY CHOOSE SECONDARY EDUCATION: ENGLISH? High schools held the responsibility for designing courses of study that focused on the nine core subjects: Latin, Greek, English, modern languages, mathematics, sciences, natural history, history including economics and government, and geography. Academies, controlled by an independent board, required tuition and were distinguished from one another by regional and local needs. Probability and Statistics Methods for Elementary Math Teachers.
