However Ritz et al report a steep increase in the number of papers in 2007, while this study shows a consistent trend of growth in Brazil's production from 2000 to 2010. For linear regression models, normality assumption was evaluated through the Shapiro-Wilk test. Palabras clave Alcoholismo; consumo de bebidas alcohólicas; ansiedad; cuarentena; infecciones por coronavirus; pandemias; salud mental; Américas RESUMO Objetivo.

A study of public library users in some countries of Latin America and the Caribbean (1983 edition)

In 2008, the Library was named Library, after a lawyer and prominent Chilean diplomat who proposed in June 1947 the creation of the Economic Commission for Latin America Cepal, to support the economic and social development of the region. For review articles, some additional inclusion criteria applied: the article must include information on how the literature search was done and which scientifically recognised index was used; selection criteria must define the type of articles included in the review. In the case of overweight and obesity, the period between 3 and 6 years of age is also crucial for inculcating healthy eating and exercise habits in order to foster proper growth.
